About me

I'm a Data Analyst with 5 years of inventory control experience and a background in computer programming. I'm currently pursuing a B.S. in Computer Science and have hands-on experience with SQL, Power BI, Excel, and Python. I work with data cleaning, data validation, reporting, dashboards, and databases to turn data into clear and useful information.

Projects

AMAZON PRICING ANALYSIS

(Python | Pandas | Data Analysis)

Project Description

Analyzed Amazon pricing data using Python and Pandas to identify pricing and discount patterns across product categories.

What I Did

- Cleaned and organized the raw dataset.
- Created new columns to measure price and discount differences.
- Compared pricing and discount patterns across product categories.

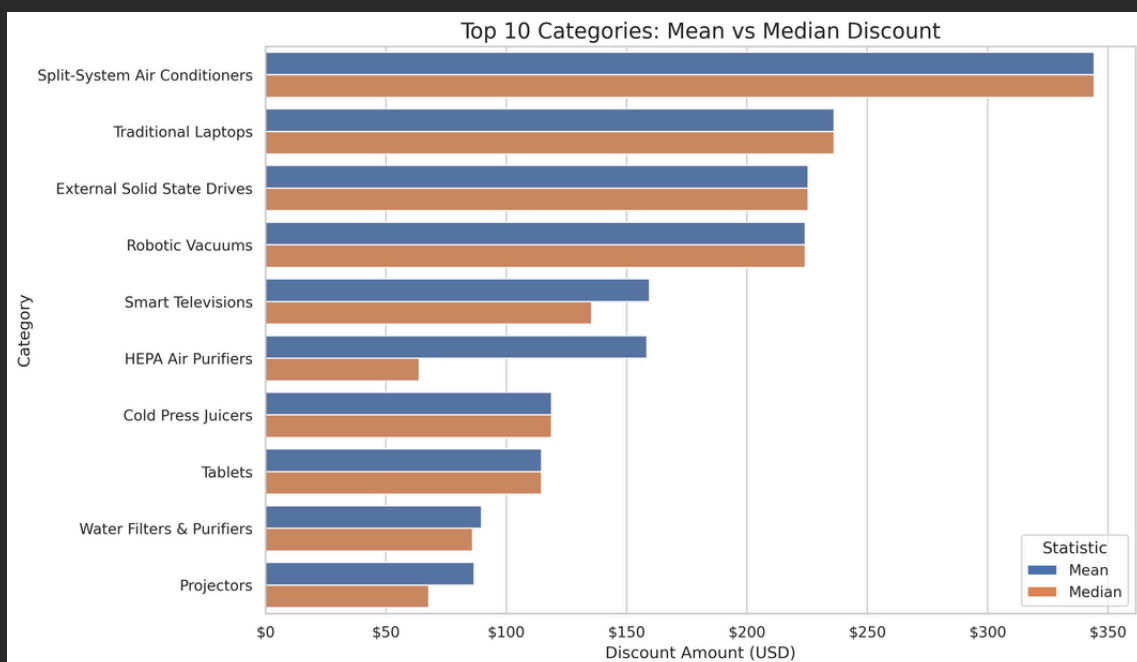

Key Findings

- Some categories showed higher discounts than others.
- Price reductions were not evenly distributed across products.
- The analysis showed clear pricing differences between categories.

Tools Used

Python, Pandas

Amazon Pricing Dashboard

(Power BI | DAX | Data Modeling)

Project Description

Built an interactive Power BI dashboard to analyze pricing and discount trends across Amazon product categories.

What I Did

- Created KPI cards to track pricing and discount metrics.
- Added interactive filters to compare product categories.
- Used DAX to calculate key measures.
- Organized the data model to support dashboard analysis.

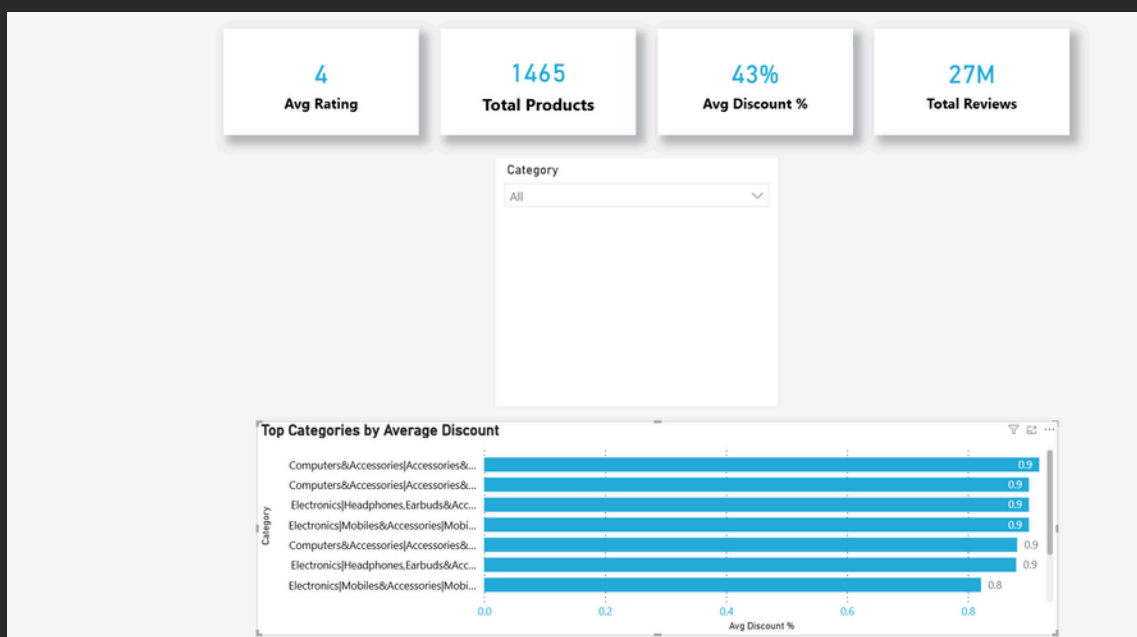

Key Findings

- Some categories had higher average discounts than others.
- Pricing varied across product groups.
- The dashboard made pricing and discount trends easier to identify and compare.

Tools Used

Power BI, DAX, Data Modeling

SQL DATABASE PROJECT

(MySQL | SQL Queries | Aggregations)

Project Description

Built a relational MySQL database to store and analyze client and transaction data.

What I Did

- Created tables using primary and foreign key relationships.
- Wrote SQL queries using JOIN to combine data from multiple tables.
- Used GROUP BY, SUM, and COUNT to create reports and summarize data.
- Organized structured data for easier querying and analysis.

What This Shows

- Experience working with relational databases.
- Ability to write SQL queries for reporting and analysis.
- Understanding of database relationships and structured data.

Tools Used

MySQL, SQL

```
-- =====
-- AGGREGATION QUERIES
-- =====

-- Count total orders per client
SELECT
    Id_Cliente,
    COUNT(*) AS total_ordenes
FROM ordenes
GROUP BY Id_Cliente;

-- Calculate total money spent per client
SELECT
    Id_Cliente,
    SUM(Cantidad_Producto * Precio_Producto) AS total_gasto
FROM ordenes
GROUP BY Id_Cliente;

-- =====
-- DATE FILTER
-- =====

-- Show orders from a specific year
SELECT *
FROM ordenes
WHERE YEAR(Fecha) = 2024;
```

PHP & MYSQL RECORD SYSTEM

(PHP | MySQL | Backend Development)

Project Description

Built a web application using PHP and MySQL to manage and update database records.

What I Did

- Created features to add, view, edit, and delete records.
- Connected the application to a MySQL database.
- Used SQL queries to retrieve and update data.
- Managed structured records through a simple web interface.

What This Shows

- Experience working with databases and backend logic.
- Understanding of CRUD operations.
- Ability to connect a web application to a relational database.

Tools Used

PHP, MySQL, SQL

[View Project on GitHub](#)

Skills

Data Analysis

- Excel, Python (Pandas), Data Cleaning, Data Validation, Data Visualization, Reporting

SQL & Databases

- SQL, MySQL, SQL Server, JOINS, GROUP BY, Aggregations, Relational **Databases**

Power BI

- DAX, Data Modeling, Dashboards, KPI Reporting

Tools

- Git, GitHub, phpMyAdmin

Education

- Bachelor of Science in Computer Science (Expected 2030)
InterAmerican University of Puerto Rico
- Technical Certificate in Computer Programming
InterAmerican University of Puerto Rico
- Certified SQL Developer – W3Schools
